Why ICT Standard?

The ICT Audit is conducted as part of the wider accreditation process by the IFGICT. The aim of an ICT audit is to review the information system architecture (including the KPI documentations), assess the actual implementation and effectiveness of controls for a system and to report on any observed operational risks relating to the operation of the system to the certification .

ACCREDITATION & RECOGNITION

Challenges

As an employer you must be conscious of the importance of hiring a well trained and certified candidate. In this era of increasing competition, it has become an ordinary incident of **scam**, where candidates present credentials which are **not provable**. However, as an employer you only want to hire an employee with valid training.

Solving the Issue

Provide official recognition services to training providers and companies that are not occupied in proper education or training.
