## 1. Executive Summary

The IFGICT Summit aims to foster collaboration and knowledge exchange among academia, industry, and e-government. The event will feature three interconnected units: ICT Academia, ICT Industry, and E-Gov. Through a combination of paper presentations, workshops, and showcases, the summit will highlight the latest advancements in ICT, explore real-world applications, and discuss the role of technology in shaping the future of governance.

## 2. Conference Objectives

**Synergy Building:** Promote collaboration and knowledge sharing among academia, industry, and e-government.

**Innovation Showcase:** Highlight the latest advancements in ICT and their applications.

**Policy Discussion:** Foster dialogue on e-government strategies and best practices.

**Talent Development:** Provide opportunities for networking and professional growth.

### 3. Conference Units

#### 3.1 ICT Academia

**Paper Presentations:** Peer-reviewed papers on a wide range of ICT topics, including AI, cybersecurity, data science, and emerging technologies.

**Student Research Showcase:** Platform for students to present their research projects.

**Keynote Speakers:** Invited experts from academia and industry to deliver keynote addresses.

#### 3.2 ICT Industry

**Workshops:** Hands-on workshops conducted by industry experts on the latest technologies and tools.

**Product Demonstrations:** Showcase of innovative ICT products and solutions.

**Industry Panel Discussions:** Discussions on industry trends, challenges, and opportunities.

### 3.3 E-Gov

**Government Showcases:** Demonstrations of e-government strategies and initiatives.

**Policy Discussions:** Panel discussions on e-government policies, regulations, and best practices.

**Case Studies:** Presentations of successful e-government implementation projects.

#### 4. Awards

**Best E-Gov Award:** Recognize outstanding achievements in e-government.

**Best Industry Award:** Recognize innovative ICT products and solutions.

**Best Academia Award:** Recognize exceptional research contributions in the field of ICT.

#### 5. Organization and Logistics

**Multi-Committee Structure:** Establish organizing and technical committees to oversee the summit.

**International Attendees:** Target 500-1000 attendees from around the world.

**Venue Selection:** Secure a suitable venue with excellent logistics and proximity to tourist attractions.

**Funding:** Secure sponsorship to cover costs of keynote speakers, lunch, coffee breaks, and other expenses.

**Registration Fees:** Implement registration fees for conference attendance, workshops, and paper submissions.

**Technical Sponsorship:** Partner with IEEE and the IEEE Smart Cities community.

## 6. Expected Outcomes

**Knowledge Exchange:** Facilitate the exchange of knowledge and best practices among participants.

**Networking Opportunities:** Provide opportunities for networking and collaboration.

**Policy Development:** Inform the development of e-government policies and strategies.

**Innovation Promotion:** Encourage innovation and entrepreneurship in the ICT sector.

By bringing together academia, industry, and e-government, the IFGICT Summit will contribute to the advancement of ICT and its applications in various domains.
