

**The world's largest
ICT federation**

C O R P O R A T E P R O F I L E

Welcome Message

IFGICT is a not for profit registered federation in US as a certified Service Provider for the provision of consultancy, training and implementation of efficient technology in the information and communication technology sector. This presentation demonstrates the outline services we do provide at IFGICT

About us

Our Mission

•To advance the capacity development profession by developing ICT standard for profession and validating individuals come across those standards through evaluation and recognition.

•To award internationally recognized, most excellent credentials for ICT and business technology development professionals wide-reaching.

Recognition

Credentials

Standards

A Few Words From Our President

"IFGICT is an independent organization created to take the lead and set industry standards and sustainability for the talent development profession in ICT and business technology. IFGICT is a international supplier of the highest quality certification and examination services in a variety of global standards and best practice frameworks in the business technology and Information Technology domains.

We are over 2000 experts & members who came from ICT industries with over 7 committees and across 40 countries , we are always open to receive experts to enlarge our federation and lead the world's sustainability improvements".

Kayyali Mohamed, Ph.D

IFGICT Countries Officers are ICT experts who act as point of contact in your region / country, they are in charge of representing IFGICT, introduce our services, manage events on behalf of IFGICT and much more, visit www.ifgict.org to view full updated list of officers and search for our contact point officer in your country.

IFGICT Country Officers

Why join IFGICT

IFGICT isn't just another membership organization. It's a **mark of excellence**. With a rigorous selection process, **only the most qualified professionals** gain entry into this **prestigious community**. By joining IFGICT's 2,000+ strong global members & network, you'll be aligning yourself with the industry's elite.

Here's what sets IFGICT apart:

- **Exclusive Community:** Gain recognition for your expertise and network with like-minded, highly skilled ICT professionals.
- **Commitment to Quality:** IFGICT upholds high standards within the industry, ensuring its members are at the forefront of technological advancement.
- **Global Reach:** Connect with a network spanning the world, opening doors to new opportunities and collaborations.

IFGICT annual Int. Cyber Security & Sustainability SDG Seminar “CSDG” Barcelona, Spain

International Seminar on Cyber Security & Sustainability in Barcelona is annual seminar hosted in UPC Barcelona, Spain. This premier event brings together industry-leading experts from cyber security companies and SDG (Sustainable Development Goals) to explore innovative solutions for protecting our digital ecosystems while ensuring long-term environmental sustainability.

“CSDG”

STech Summit

World's Largest Sustainable Technology Summit
"STechSummit.org"

STech will gather all public, private and civil society organizations from across the humanitarian and international development community.

Process of Audit at IFGICT

Process

Cyber Security Committee

The IFGICT cyber security committee plays a vital role in ensuring adherence to strong cybersecurity practices. They conduct audits that assess compliance with two key standards: the ITU standard, a globally recognized framework for information technology security, and the IFGICT's own cyber security standard. This comprehensive approach ensures clients meet both international benchmarks and the specific requirements outlined by IFGICT. Following the audit, the committee meticulously reviews the client's report, identifying areas of strength and potential weaknesses. This review process allows for tailored recommendations that can further enhance the client's cybersecurity posture.

- *Loai Arnous, Cyber Security Committee President*
- *Anton Sudnik, Cyber Security Auditor Expert*
- *Pavel Kodis, Cyber Security Auditor Expert*
- *Sam Sukhon, Cyber Security Auditor Expert*
- *Vlad Murashka, Cyber Security Auditor Expert*

Sustainable Development Committee

The IFGICT SDG committee plays a crucial role in ensuring organizations comply with both UN Sustainable Development Goals (SDGs) and IFGICT's protocol standards. They achieve this through a rigorous audit process. The committee meticulously examines reports submitted by clients, assessing their alignment with established criteria for both UN SDGs and IFGICT's specific benchmarks. This dual approach guarantees clients not only adhere to the broader UN sustainability framework but also meet the additional requirements set forth by IFGICT. Through this comprehensive review process, the IFGICT SDG committee fosters responsible practices and empowers organizations to contribute meaningfully to achieving the UN's global sustainability goals.

*Carles Agusti, SDG committee president
Victor Caplescu, Abdessamad MALAOU
Kaoutar Benis, Leopoldina Patriani, Peter Désilets
Brenda Lava*

Data Center & Green ICT Committee

The IFGICT data center and green ICT standard committee plays a crucial role in ensuring data centers adhere to environmentally friendly practices. This committee conducts audits to verify compliance with the IFGICT protocol manual, a set of guidelines designed to promote energy efficiency and sustainable IT practices within data centers. During these audits, the committee meticulously examines the client's report, which details the data center's operations and adherence to the IFGICT standards. This review process allows the committee to identify areas where the data center may be excelling in green ICT or pinpoint aspects that require improvement to achieve full compliance with the IFGICT protocol manual

*Samah Alafeef, Committee president
Lara Srour, Isac George ,
Gemma Sasmita, mohammad abdallah*

Artificial Intelligence Standard

The IFGICT Artificial Intelligence committee works in conjunction with the ITU-T (International Telecommunication Union - Telecommunication Standardization Sector) to develop and implement international standards for AI. This group identifies areas where standardization is needed for sustainable AI development.

IEEE Block Chain Standard

The IFGICT IEEE blockchain standard committee plays a crucial role in ensuring adherence to IEEE's blockchain standards. They conduct audit-based compliance assessments, meticulously examining a client's report to verify if it aligns with the established criteria. This review process involves a deep dive into the client's documentation, likely focusing on technical aspects like data formats and implementation procedures. By holding clients accountable to these industry benchmarks, the IFGICT IEEE committee helps promote trust and transparency within the blockchain landscape.

Healthcare Data Privacy Standard

The IFGICT healthcare HIPAA standard committee plays a vital role in ensuring healthcare organizations adhere to the Health Insurance Portability and Accountability Act (HIPAA) regulations. This involves a thorough review of the client's report, which details their HIPAA policies, procedures, and how they safeguard protected health information (PHI). The committee then examines the organization's practices against HIPAA standards to identify any gaps or areas of non-compliance. This auditing process helps healthcare providers maintain robust data security measures and protect patient privacy.

Smart City Standard Committee

IFGICT Smart City Committee plays a crucial role in shaping the future of urban development through the lens of information and communication technologies. Dedicated to advancing the concept of "people-centred smart cities," the committee focuses on developing and promoting standards, guidelines, and best practices that ensure technological advancements in urban environments are inclusive, sustainable, and enhance the quality of life for all residents.

VTP (Verified Training Partner)

The IFGICT VTP (Verified Training Partner) program is designed to boost the credibility and international recognition of training institutions in the ICT, business technology, and FinTech sectors. By becoming a VTP, institutions gain the authority to certify their own students upon course completion. IFGICT then issues official certificates **co-branded with the institution's logo**, with **online verification number** for each candidate, adding a layer of international validation to the training programs. This program allows institutions to enhance their reputation and marketability, while students benefit from receiving globally recognized certification for their acquired skills.

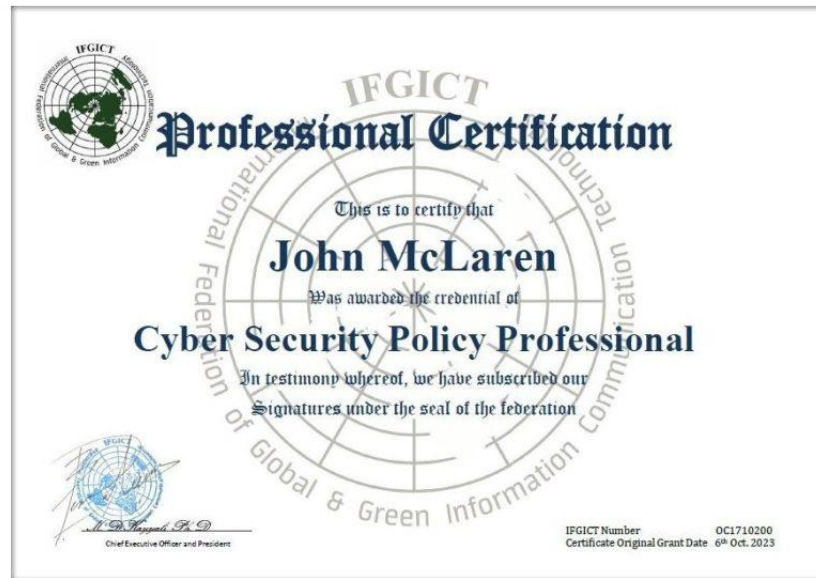

Some of our Professional Certifications

“CSPP” Cyber Security Policy Professional Certification

Obtaining the Cyber Security Policy Professional Certification by IFGICT offers numerous benefits for individuals seeking to advance their careers in the field of cyber security policy. Firstly, this certification validates your knowledge and skills in developing and implementing effective cyber security policies, making you a valuable asset to organizations looking to enhance their security measures

Successful track record

A strong portfolio of clients and partners is a powerful tool for IFGICT. It showcases a successful track record, with satisfied clients acting as testaments to the IFGICT's expertise. Partnering with well-respected organizations such as IFGICT further bolsters credibility, demonstrating the ability to collaborate effectively. This combined effect creates a sense of trust and confidence, making potential clients more likely to choose them over competitors.
